**FRUIT TREE NOTES:** All fruit trees offered this year are semi-dwarf to standard. Peach/pear/plum require some pruning and should be kept pruned to 10-12 feet. If they become too big, they will be unproductive. Trees listed as self-fertile will produce fruit, however will put forth more fruit with a pollinator. Plant 2 different varieties to ensure pollination. **All trees are bare-rooted 4'-6' and need to be planted as soon as possible.** If not planted, keep cool in moist bedding to keep roots from drying out until planted. Tree tubes and/or protectors are recommended if wildlife damage is a concern. **To help you get the best results from your trees, we suggest picking up information that will best explain proper trimming.** Information will be available at pick up.

**FRUIT TREES:**

**AMBROSIA (Bud9/EMLA– Intermediate size, well anchored, collar rot resistant, greater tolerance to fire blight.) Pollinator 4'-6' bare root \$18.00**

The fruit finishes with a 50% pink to red blush over a yellow background color. The flavor is sweet and very pleasant and texture is crisp. A low-acid apple, easier to digest. Slow to brown and great in salads, baking and main dishes. Ambrosia matures late September in south central PA. Tree growth habit is compact, upright and very productive. **(10'-12' Mature Tree)**

**HONEYCRISP (PP#26644) (EMLA7-Semi Dwarf) Pollinator 4'-6' bare root \$18.00**

This cultivar is a red strain of Honeycrisp. This crisp, juicy, sweet-tart apple has a rich flavor that has made it number #1 in taste panels. Fruit averages 3 inches and up, matures mid September. Tree has outstanding hardiness, and late blooming. Moderately resistant to apple scab. **(12'-15' Mature Tree)**

**LIBERTY (Bud118-Semi Dwarf—winter hardy rootstock, resistant to collar rot, requires staking) Pollinator 4'-6' bare root \$18.00**

A medium-sized, yellow-fleshed dessert apple. Tree is vigorous spreading and an annual bearer. Resistant to apple scab, cedar apple rust, fire blight and mildew. A good choice for the home gardener. **(15'-20' Mature Tree)**

**GOLDEN DELICIOUS (Bud118-Semi Dwarf—winter hardy rootstock, resistant to collar rot, requires staking) Pollinator 4'-6' bare root \$18.00** A russet-resistant selection of the original Golden Delicious. Most widely planted apple cultivar worldwide. Fruit is firm, medium to large with the classic Golden Delicious flavor. Excellent eating apple! Tree is spreading, productive and easy to manage. Fruit thinning is required to maintain annual bearing. **(15'-20' Mature Tree)**

**BEURRE D'ANJOU (OHxF87) Hardy rootstock, resistant to fire blight, Semi-Dwarf 4'-5' bare root. \$18.00 Needs a Pollinator.**

This pear hits all the right notes. It's cold-hardy, vigorous and precocious. Bright green and very firm at harvest, with a tinge of yellow as it ripens. Subtly sweet, fine-textured flesh. More blight resistant than Bartlett. Can be kept in cold storage until spring. **Will pollinate Sunrise.**

**SUNRISE PEAR (OHxF87) Hardy rootstock, resistant to fire blight, Semi-Dwarf 4'-5' bare root. \$18.00 Needs a Pollinator.**

Juicy, aromatic and sweet. This hearty tree produces beautiful yellow pears with a slight blush. Fruit is good for eating fresh or making desserts. Stores well, lasting 2-3 months in proper refrigeration. Disease-resistant to fireblight and pear scab. Ready to harvest mid to late August. **Will pollinate Beurre D'Anjou.**

**LORING PEACH (Lovell stock) 4'-6' bare root. \$18.00**

A large, firm, yellow-fleshed freestone with attractive red color over a yellow ground color. Considered one of the best canning and freezing varieties. The tree is vigorous, productive and resistant to bacterial spot. Harvest late August—early September. **Self-fertile**

**VICTORIA PEACH (NJ353cv)PP#18,134 (Lovell Stock) 4'-6' bare root. \$18.00**

A large freestone peach with 40 percent red blush over a yellow background color. The flesh is very firm with excellent flavor and maintains its fruit quality in cold storage. Good for fresh eating, canning and freezing. The tree is winter hardy, vigorous and productive with low susceptibility to bacterial spot. This is one of the best late season varieties, harvested in mid-late September. **Self-fertile**

**“All fruit trees should be planted, when possible, away from frost pockets and low lying areas to minimize the risk of injury from late spring frosts. Fruit trees grow best in a well-drained slightly acidic soil. Avoid planting any fruit or vegetable crop near black walnut trees. Black walnut roots contain a substance called juglone that will kill or injure many plant materials including fruit trees.”**

*Tom Ford, PSU Horticulture Educator*

**SANTA ROSA PLUM (Japanese variety) (Cert Myrobalan) 4'-5' bare root. \$18.00**

A large, attractive reddish-purple plum with yellow flesh. The fruit is firm with excellent quality. These beautiful plums are great for eating and also perfect for canning, freezing, cooking, and drying. One of the most frequently planted Japanese plums. Considered **Self-fertile** and a good pollinizer. Harvest mid August. **(18'-20' Mature Tree)**

**METHLEY PLUM (Japanese variety) (Cert Myrobalan) 4'-5' bare root. \$18.00**

An early plum with fine quality and appearance. The fruit is purple with red sweet flesh and very juicy with a distinctive flavor. Ripening in early to mid-July, Methley is **Self-fertile** and also a good pollinizer. **(18'-20' Mature Tree)**

**STELLA CHERRY (Mazzard) 6' bare root—whip. \$25.00**

Sweet and productive. This tree bears plump, bold-red cherries that will have fruit lovers rejoicing! Grow abundant crops of heart-shaped fruit: a healthy go-to for fresh snacks. Also suitable for canning, freezing and drying to enjoy later. Resists cracking and is moderately disease-resistant. Root stock is resistant to root-knot nematodes and oak-root fungus. Plant in full sun, loamy, well drained soil (average moisture) 6.0-7.0 PH. Harvest cherries in June. **Self-fertile (Mature tree can grow 20' or more—prune to keep to your manageable size)**

**ORNAMENTAL & SHADE TREES**

**PRAIRIFIRE CRABAPPLE (Malus) NATIVE 5' low branched, bare-root. \$36.00**

The showy, dark pink to red flowers are what draw most people to the prairifire flowering crabapple. The long-lasting spring blossoms are a sight to behold. This variety also offers year-round beauty with its changing leaf color. Glossy maroon or purplish-red in spring, the leaves become dark green with purplish-red veins in the summer then a beautiful bronze color in autumn. Disease-resistant and able to adapt to many different soils. Full sun is ideal—at least 6 hours unfiltered. Yields abundant maroon-colored berry-like drupes up to 1/2. Medium growth rate (13"-24" a year). **(Mature tree grows to 20'x 15')**

**SPRING SNOW CRABAPPLE (Malus) NATIVE 5' low branched, bare-root. \$36.00**

This fruit-less variety explodes with stunning fragrant white flowers in the spring! No worry about messy fruit to deal with. It's crisp, clean, classic upright oval form makes it possible to use in many different ways throughout your landscape. Pristine white flowers with shiny bright green leaves, turn a harvest yellow shade in the fall. Excellent resistance to diseases and displays a uniform outline without pruning. Plant in well drained soil, in full sun. Provide regular supplemental water when rainfall isn't sufficient. Once established it can tolerate cold winters, and hot summers. Fast growth rate. **(Mature tree 15'-25' high, 15'-20' wide)**

**RED SUNSET MAPLE (Acer rubrum) NATIVE 5' branched, bare root. \$42.00**

Medium sized, deciduous tree. Leaves are medium to dark green above and gray green below. Excellent orange-red foliage color in fall. No serious insect or disease problems. Low maintenance, plant full sun to part shade. Has strong wood and is a vigorous, fast-grower will take on a pyramidal or oval silhouette. **(Mature tree 50 feet with a spread of 25'-35')**

**NORTHERN RED OAK (Quercus rubra) NATIVE 6' high branched, bare root. \$48.00**

One of the faster growing oaks for the home landscape. The leaves are handsome throughout the year, emerging pinkish-red, turning lustrous dark green in summer, and changing to russet-red to bright red in autumn. Acorns are medium brown, 3/4" to 1 inch long, and barrel-shaped. Prefers moist, well-drained soil and is tolerant of most soil types. Plant in full sun or partial shade. Moderate growth. **(Mature tree 60'-75' height/width)**

**RIVER BIRCH (Betula nigra) NATIVE 5' bare root. \$32.00**

As its name suggests, the river birch naturally grows along riverbanks. But as a landscape tree, it can be planted almost anywhere in the U.S. It can grow single trunk or multiple. Valued for its relatively rapid growth, tolerance of wetness and some drought, unique curling bark, spreading limbs, and relative resistance to birch borer.

Choose a planting site that receives full to partial sun, preferably in the morning hours. Afternoon shade helps maintain cooler soil. The river birch grows well in acidic, loamy, moist, sandy, well-drained, wet and clay soils. **(Mature tree 40'-70', spread of 40-60')**

**SWAMP WHITE OAK (Quercus bicolor) NATIVE 6' High branched, bare root. \$48.00**

A striking tree with attractive peeling bark, especially on young trees. The lustrous, lobed leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow. An excellent shade tree for any landscape. Mature height 50' to 60'. Grows at a medium rate, with increases of 13"-24" per year. Full sun and ideal in acidic, moist, well-drained, and wet soils. It is also drought-tolerant. Yields oblong acorns in pairs, each approximately 1" in length. This species attracts a variety of birds.

**(Mature tree 50'-60' in height and width)**

## SHADE TREES (CONT)

### **NIOBE WEeping WILLOW** (*Salix alba 'Tristis'*) **Native 4' bare root whip \$12.00**

A fast growing form of Weeping Willow. It has a wide spreading head with long golden-yellow, drooping branches and it likes moist areas. Showcases bright green leaves that turn yellow in fall. The large, classic weeping form is definitely displayed in this tree. Plant in full sun or partial shade at least 35 feet from your septic system or leach field. The tree's aggressive root system gravitates to water. Willows like acidic, alkaline, loamy, moist, rich, sandy, well-drained and clay soils. **(Mature size 50'-60' tall x 50'-60' wide)**

**\*\*Evergreens come bundled 10 seedlings to a bundle. They are dipped in a solution to keep roots moist until you can plant them. Seedlings are typically planted by "healing" them into the soil. It is not necessary to dig a large whole. More information can be provided when you pick up your seedlings.**

## EVERGREEN SEEDLINGS:\*\*

### **NORWAY SPRUCE** (*Picea abies*) **10 seedlings/\$10.00**

Graceful accent in your yard, or an effective windbreak. Has a characteristic pyramidal outline with upright main branches covered with pendulous secondary branches that have a pleasing "droop" to them. Grows fast (up to 2 feet/year) and provides cover/food source for wild songbirds. Strong root system withstands high winds. Plant 8-10 ft apart for a solid screen. Sun lover, tolerates a variety of soils, prefers well drained soil. Water during severe drought periods. Mature height 50-70 feet, 25-35 feet spread. **2 yr. seedlings - 18"-24" high, bare root.**

### **DOUGLAS FIR –Lincoln** (*Pseudotsuga menziesii*) **10 seedlings/\$10.00**

Excellent demand as a Christmas tree or an ornamental. Extremely fast growth, superb needle retention and soft. 1" blue-green needles make Douglas the favorite tree for many. Prefers fertile, well-drained, light soil with full sun. Can grow 40'-60' high, spread 15'-25' in an erect pyramid in the landscape. **2 yr. seedlings - 5"-12" high, bare root.**

### **WHITE PINE** (*Pinus strobus*) **10 seedlings/10.00**

Fast growth to 90-100 feet/spread of 25-40 feet, and excellent needle retention. Soft blue-green needles 3-5" long. Excellent ornamental tree, naturalizing, windbreak or dense screen. Desirable for Christmas trees and reforestation. Tolerates wide variety of soils. Full or partial sun. **2 yr. seedlings – 7"-10" high, bare root.**

### **FRASER FIR—Roan Mtn** (*Abies fraseri*) **10 seedlings/10.00**

Often called Southern Balsam Fir. Grows 40-60 feet in height with a spread of 20-25 feet. Very soft, shiny, dark green foliage is silver on the underside. Likes cool, moist, well drained soil and northern exposure. Will not do well in heavy, wet, clay soil. Does not require full sun. Needs only light shearing. The best Christmas tree with good needle retention. **2 yr. seedlings – 6"-12" high, bare root.**

### **COLORADO BLUE SPRUCE—Kaibab** (*Picea pungens glauca*) **10 seedlings/10.00**

The Colorado Blue Spruce is a popular conifer. It's a classic evergreen that is easy to grow and shears very nicely. The shape is conical and the bark is grayish-brown to dark-gray. New growth in the spring is especially blue in color. Once properly established, this spruce has decent drought and flooding tolerance. Naturally deer resistant. The Kaibab variety has a classic look. The colors range from green to blue. **2 yr. seedlings – 6"-12" high, bare root.**

## GROUND COVER:

### **VINCA MINOR** (*Myrtle*) **Native**

Dark green ground cover with a blue-violet flower in April, grows 3"-6" tall. Spreads in a vine method from the root stem. 10-20 runners tied to form one clump. Plant clump as one unit in clean soil, free of weeds, 6"-12" apart in partial or full shade. Clump contains 10-20 runners. **Sold 50 clumps/\$30.00**

### **PACHYSANDRA** (*Spurge*) **Native**

Grows in sun or shade to a uniform height of 6"-12". Excellent in masses under heavy shade trees. Dense, lustrous evergreen, trailing vine-type ground cover. White flowers, March to early April. Plant 6" apart and it will give a pleasing effect immediately and in two years time form a solid ground cover. Any soil, water liberally until established. Very hardy. **Sold 50 rooted cuttings/\$30.00**

## SHRUBS

### **AMERICAN HAZELNUT (*Corylus Americana*) Native**

Also known as American Filbert. Native shrub with tasty nuts prized by cooks for easy-to-crack shells and small sweet kernel. Squirrels love them as well! Hedges can be used as windbreaks, visual screens, and to attract wildlife. Grows to a height of 15'-18', spread of 10'-12' at a medium to fast rate. Full sun/partial shade in acidic, alkaline, loamy, moist, rich, sandy, well-drained and clay soils. Drought tolerant. Grows in rounded shape.

**3 year seedlings 24"-36". Sold 3 seedlings/\$13.00**

### **DONALD WYMAN LILAC (*Syringa x prestoniae*) Native**

Considered by many to be the finest lilac, this gem features upright panicles of lightly fragrant pinkish-purple flowers in late spring; multi-stemmed and upright, forms a large ball; a superb specimen plant; full sun and well-drained soil; non-suckering. This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies. Grows in full sunlight and is very adaptable to both dry and moist locations. It is not particular as to soil type or PH. Ten feet tall at maturity, with a spread of 8 feet. Typical clearance of 3 feet from ground.

**Sold as one 2' bare root for \$18.00**

### **WEIGELA—Wine & Roses (*Weigela florida Alexandra*) Pronounced Y-Gee-Lah**

This Weigela has two bloom seasons! Radiant pink blooms first appear in the late spring. The blooms make a second appearance in the summer. Paired with these blooms is a dark wine-colored foliage making for a grand eye catcher regardless of where you chose to plant it. Use this Weigela to add color to your landscape or use its cut flowers in your arrangements. It does well with mass planting and border planting. Plant in full sun, receiving a minimum 6 hours. Prefers medium-moist, well-drained soil, and has average water needs. It is adaptable to all soils with varying PH levels. Slow release fertilizer should be applied in the spring. Pruning should be done in the early spring. Grows 48" to 60" inches high, spread of 40" to 60" inches. Attracts hummingbirds and resists deer.

**Sold as one 2' bare root for \$18.00**

## VEGETABLE:

### **JERSEY KNIGHT ASPARAGUS**

Superior variety, all male hybrid, high yielding, vigorous in growth, tolerant to fusarium crown and root rot, high resistance to rust. Plant in fertile, well drained soil in a sunny area with a PH of 6.5—7.0. Rows should be 4 foot apart, plants 12 inches apart in row/open furrow, 8 inches deep.

**Sold 5 (1 Year Crowns) for \$8.00**

**CANADA RED RHUBARB (*Rheum*)** A high-quality, popular garden vegetable as ornamental as it is delicious. Long-lived perennial that will grow up to 18 in. high with a 24 in. spread, in a full, mounded form with a lush and vibrant appearance. The bright red stalks have a tart, acidic flavor eaten raw which some people love, but it's when you add some sugar that the unique flavor of the Rhubarb will be revealed for the rare gem it is. Delicious in sauces, pies and other desserts. Rich in vitamin C, fiber and other nutrients. Plant in well drained soil in full sun. Best if it gets afternoon shade in the heat of summer.

**Sold (3) plugs/\$13.00**

*If you see something you like in this catalog —don't delay in ordering.  
We have reserved the stock listed and are not always able to obtain numbers  
beyond our original order. Don't wait until the last minute.*

## BERRIES:

### ALLSTAR STRAWBERRY (*Fragaria vesca*)

A top-performing variety! This easy-care plant is highly disease-resistant, cold hardy, and very vigorous, giving you crops of large, glossy, firm berries with an exceptionally sweet taste and that perfect strawberry shape. You'll want to plant plenty of extras for freezing or making preserves. Ripens in June. **Self-pollinating.**

**25 crowns/\$14.00**

### FLAVORFEST STRAWBERRY (*Fragaria ananassa*)

A June bearing strawberry that combines excellent flavor, and high yields. Plants produce beautiful deep red, large, delicious berries that are plump and juicy! Excellent for eating fresh, freezing and in jams, jellies and pastries. Flavorfest exhibits excellent disease resistance to red stele, crown and fruit rot diseases. Produces one large crop of berries over a few weeks time. **Self-pollinating.**

**25 crowns/\$14.00**

### ALBION STRAWBERRY Everbearing variety (*Fragaria vesca*)

Everbearing, which means they will flower and fruit continuously from late spring into the fall. Long, conical, symmetrical; firm fruit bursting with sweetness. Plants grow quickly to about 12" in height, with a spread of 12 to 24 inches if grown in full sun and very rich, well-drained soil. Plants need moisture and require weekly watering (if there isn't consistent rain) in order to produce good, plump berries. Resists Verticillium wilt, Phytophthora crown rot and resistance to anthracnose crown rot. **Self-pollinating.**

**25 crowns/\$14.00**

### JEWEL BLACK RASPBERRY (*Rubus occidentalis*)

Vigorous and erect, this raspberry adapts to many areas. Large berries of excellent flavor ripen in June. Good soil, mulch and ample water help success with one of the best treats in spring. Space in a 4' circle or 3' apart in rows 5' wide. **Self-pollinating.**

**1 Year Rooted cuttings. 5 cuttings/\$17.00**

### HERITAGE RED RASPBERRY Everbearing Variety (*Rubus idaeus*)

This variety produces abundant crops of large, sweet, dark red berries that are perfect for eating fresh, canning, freezing, jams and jellies. Self-supporting, upright canes are hearty enough to grow in poor soil, but require a well-drained site. Cold-hardy. Floricane berries ripen in July. Primocane berries ripen in September through frost. Plant 3' - 4' apart to ensure room for growth. This variety can be mown, or hand cut low to the ground (1"-2") in early spring. **Self-pollinating.**

**1 Year Rooted Cuttings. 5 cuttings/\$17.00**

### ELDERBERRY (*Sambucus canadensis*) **NATIVE**

American, or common Elderberry grows in medium to wet, well-drained soils in full sun to part shade. Expansive, flat, white flowers give way to clusters of black elderberry fruits in late summer. The fruit can be used to make jams, jellies, pie fillings and elderberry wine. Berries have a very high anthocyanin content.

**Self Pollinating. Bare root seedling 2' to 3' Sold 3 seedlings/\$13.00**

The **blueberry plants** are self fertile plants, however, for heavy fruit production **we recommend** purchasing two different varieties for cross pollination. Plant in acidic soil, in full sun (at least 6 hours) or partial sun. Mulch with year old mulch. (Pine preferred). New mulch depletes nitrogen and can kill young plants. Pick up information when you pick up your plants.

## BLUEBERRIES (*Vaccinium*)

### CHANTICLEER (Early season)

Vigorous highbush cultivar and one of the earliest of all blueberries. Plant height is 6 ft in upright position. Produces medium to large berries, sweet flavor, slightly tart, light blue color. Berries ripen by late May to mid-June, depending upon the spring weather. It shows high resistance to stem blight and mummy berry. Plant in full sun. Water in extreme dry periods. **1 Gallon pot/\$13.00**

### BLUEJAY (Mid Season)

Enjoy long harvests of flavorful, delicately sweet blueberries that hang well on the bush. This Northern Highbush Blueberry is perfect for northern gardeners. Resists cracking. Cold-hardy. Plant in full sun. Grows 4'-6' in height. Ripens in July, self-pollinating. **1 Gallon pot/\$13.00**

### JERSEY (Late Season)

Enjoy abundant crops of large, light-blue berries. Plant has a tall, attractive shape, 6-8 feet tall. Blueberries ripen in late summer and foliage turns orange-red in fall. Resists cracking. Bush will like being in partial to full sun, well-drained soils, and will need regular watering. **1 Gallon pot/\$13.00**

### BONUS (Mid-Late Season)

Blueberry variety generating the largest berry on the market today. A strong producer of extra large, light blue fruit that is both sweet and tasty. Bears the first part of August. The plants seem to have resistance to many of the blueberry fungal diseases. Very high frost resistance. Cold tolerant, plant in full sun. **1 Gallon pot/\$13.00**

**Special note:** Do not plant Red Raspberries within 75-100 feet of Black raspberries. Black raspberries may be more susceptible to viral diseases carried by aphids to and from nearby raspberry plants. If you have limited space, always **plant black raspberries upwind** from the **red raspberries** so that aphids are not blown by wind from red to black raspberries.

The following perennial flowers are provided by Faught's Garden Center and are being sold in a larger **6"pot**, resulting in a **larger starter plant** for you. **Sold 3 pots for \$16**

**ARIZONA RED (*Gaillardia x grandiflora*) Native Sold 3 pots/\$16**

Compact perennial growing to a height of 10"-12", spread of 12"-18". Large brightly colored daisy-like flowers, in shades of red with a slight yellow center. Light green foliage tends to remain low and dense right to the ground. Long blooming, July through October. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. This plant thrives in full hot sun and poor soils. Attracts pollinators, Very hardy.

**SNOWSATION (*Iberis sempervirens*) Sold 3 pots/\$16**

Also known as Candytuft, this is a spring blooming favorite, often cascading over rocks and walls, or as a groundcover. The dark green, evergreen foliage forms a perfect mound with masses of large white flower clusters in early spring, lasting for several weeks. Prune lightly right after blooming, but otherwise leave plants alone. Drought tolerant, deer resistant. Grows 6"-10" in height, spreads 10"-12". Prefers a well-drained site, full sun to partial shade. Not easily divided.

**LAVENDAR Hidcote Blue (*Lavendula angustifolia*) Sold 3 pots/\$16**

An evergreen, perennial shrub with gray foliage and abundant, fragrant, deep purple flower spikes that attract butterflies. Mound shaped 12"-18" tall and wide. Blooms mid summer. Fragrant spikes for cutting, and also used as a deterrent against insects. Plant in full sun, water occasionally, more often in drought conditions. Right after flowering (or by end Sept), give your plants a very hard trim. Cut all the new growth back down to 1-2cms above the older, woody part of the stem.

**RED OMBRE CONEFLOWER (*Echinacea*) Native Sold 3 pots/\$16**

Red flowers soften to orange shades as they age. This coneflower enjoys a compact habit and provides a vibrant floral display from late spring to late summer. Grows in clumps up to 16-18 in. high x 10-24 in. wide. Thrives in full sun or light afternoon shade. Prefers dry soil. Drought, deer, rabbit resistant. Attracts pollinators and songbirds. Remove spent flowers and cut back stems to encourage further blooms and reduce self-seeding. If not cut back, birds will feast on cone seeds during winter.

**RED WINGS CREEPING PHLOX (*Phlox subulata*) Native Sold 3 pots/\$16**

Easily spotted from a distance, striking pinkish-red blooms show off deep red centers. This stunning ground cover grows just about anywhere with very little effort. Bright, cheery color appears quickly in late spring amid the needlelike, semi-evergreen leaves to create a lush carpet. Looks fabulous in borders and creeping over rock gardens! When contrasting colors are planted together they create a patchwork of glorious hues that flood your landscape for a breathtaking effect. Easy to grow. Plant in well drained soil, in full or partial sun. Grows 4-6 in. high with a spread of 12-18 inches. You can clip plants lightly immediately after blooming to encourage a dense habit. Drought tolerant, deer resista

**HOT RASPBERRY BUTTERFLY BUSH (*Buddleia*) Sold 3 pots/\$16**

Hot Raspberry wakes up summer's doldrums with splendid raspberry-pink flowers. Blooming from early summer to late fall. A multi-stemmed deciduous shrub with a densely compact, rounded habit, growing 3'-4' tall and 2'-3' wide in two years. A magnet for many pollinators, especially butterflies. The flowers and foliage make lovely bouquets. Plant in full sun, and does better in well drained to dry areas. Relatively low maintenance shrub, best pruned in late winter once the threat of extreme cold has passed.

**\*\*In some cases growing conditions may force a substitution in color of the varieties we are offering. We don't anticipate this, but will notify you if such an event occurs.**

**PERENNIAL FLOWERS** (The flowers listed below are provided by Musser's Nursery and come in **3" pots**, in their **dormant** stage. New growth should appear in June. These will be sold **3 pots for \$8.00**.)

**BLACK-EYED SUSANS** (*Rudbeckia fulgida*) **Native**  
A very vigorous and compact variety, exceptionally bright golden daisy-like flower with brown centers, July into fall. Height and spread of 2' to 2 1/2'. Easily re-seeds and attracts wild birds, (a favorite of wild turkeys). Well drained soil, full sun. **Comes in 3" pots. 3 pots/\$8.00**

**PURPLE CONEFLOWER** (*Echinacea purpurea*) **Native**  
Large, daisy-like flowers grow on sturdy stems generally 3' tall. The flower petals range in color from purple to lavender. The seed center is a large, copper colored cone, hard and prickly. Blooms all summer and into autumn. Full sun or partial shade. Prefers well drained fertile soil, but is drought tolerant. Goldfinches and other birds love to feast on the seeds in winter. **Comes in 3" pots. 3 pots/\$8.00**

**STELLA D'ORO DAYLILY** (*Hemerocallis*) **Native**  
A perennial with a shapely form and graceful arching foliage. Stella grows in a nice clump about 12" high, producing bold gold trumpet-shaped flowers at the ends of the stems from early summer to early fall. This is a relatively low maintenance plant. Plant in full sun to partial shade and very adaptable to both dry and moist locations. This daylily can be propagated by division and is best done in the early spring when new growth is seen.

**FLOWERING PERENNIAL BUSH: PEONY (*Paeonia*)**

Classic perennials loved for their exquisite flowers, fragrance and bold foliage. Bloom late May, and foliage remains attractive until frost. Reliable and vigorous reaching a height up to 36" and 24"-36" in spread. Best in full sun, but will tolerate late afternoon shade. Plant in rich, fertile, medium moist, well drained soils. Deer & rabbit resistant, attractive to butterflies. Perfect as a specimen plant and in groups for borders and beds. Excellent cut flowers. Peonies seldom need to be divided or moved, but if necessary it should be carried out only in the fall. Trim off old stems to the ground in late fall, to help prevent disease problems. **Available in a "3-5 eye" crown. Planting information will be available at pick up.**

**Sold 1 bagged crown/\$12.00**

**SARAH BERNHARDT**—All time favorite with very large 8 inch wide, delightfully fragrant, rose-pink double flowers, with delicately ruffled inner petals occasionally flecked with raspberry tones. This heirloom from 1906 is also delightfully fragrant, and one of the strongest growers and most reliable bloomers. Peonies produce their extravagant display in early June every year, regardless of weather, because they are among the most durable and longest-lived plants. After bloom is complete, you are left with a handsome mound of glossy, deep green foliage. Superior cut flowers, lasting more than a week if cut in full bud.

**DUCHESS DE NEMOURS**— A very old, but extremely beautiful peony. Free-flowing and deliciously scented, it produces crown shaped blossoms with rich creamy-white petals, delicately touched with a hint of yellow. Blooms late spring into early summer. Grows in a lush mound of glossy green foliage that remains attractive until frost. Popular for over 150 years.

**NIPPON CHIEF**— This selection is a single, Japanese-style flower featuring rich, scarlet-red petals surrounding a prominent center of yellow petaloides. This late season bloomer will provide prolific flowers late spring into early summer—after most peonies have already bloomed. This herbaceous peony grows in a lush mound of glossy green foliage that remains attractive until frost. Excellent for cutting. Compact habit. Easy to grow. Flowering is always best in a sunny location. Staking, or fencing around the stems, may be required as the large peony heads tend to arch toward the ground and may be pulled

***Peonies are cold hardy perennials. They should be planted the first chance you can get a shovel in the ground, regardless of frost or freeze potential. Plant them as soon as possible. Pick up more information when you pick up your peonies.***

## WILDLIFE BOXES:

### CLASSIC EASTERN BLUEBIRD BOX WITH VENTS & PLUGS – \$30.00

Approved by the North American Bluebird Society. 7/8" Kiln Dried Cedar. Overall Size 7.25" x 9.25" x 12", 1.5" entry hole with a 7/8" predator guard. Overhanging roof with ventilation. Easy open front for monitoring and cleaning. Accommodates other species of birds such as tree swallows, chickadees, titmice and nuthatches. Installation instructions included.

### BLUEBIRD FEEDER \$35.00

If you enjoy bluebirds who tend to overwinter, you may be interested in this feeder. Made with kiln dried cedar, inside acrylic plastic guard to prevent mealworm escape and inside perches to help young bluebirds exit. Can be a hanging feeder or post mounted feeder. **Size: 14"W x 9"D x 9.5"H, Weight: 5.5 lbs**

**BAT HOUSE – 1 CHAMBER \$28.00** Assembled cedar wood, grooved landing pad for easy landing, air vents, top joints sealed for warmth, grooved inside chamber walls. Overall size 10" W x 4" D x 16"H. Placement instructions included. **Good for natural mosquito and insect control.** (Can hold 25+ bats) Also available in 2 & 3 chamber size. (Call for pricing on larger boxes)

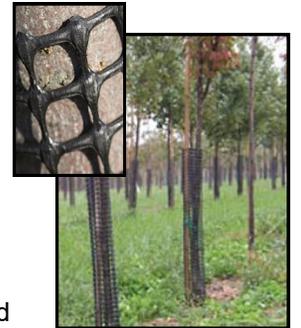

**\*\*Other wildlife boxes, such as bird, butterfly, duck and squirrel, as well as feeders, are available upon request. Call our office for more information and pricing.**

## OTHER ITEMS OF INTEREST:

### TREE BARK PROTECTORS

**\$7.00 each/2 ft. protector \$8.00 each/3 ft. protector**

An attractive solution to animal and lawn care equipment damage. Deer, squirrels, rabbits and groundhogs cannot bite or rub tree bark through this rigid plastic mesh. Trunks are shielded by open mesh, preventing moisture and mildew buildup. The protectors won't harbor insects and animals. Designed to blend in, flexible and easy to install. Sold in 24 inch and 36 inch length, each with 4-inch diameter. Comes with zip ties. Recommended for fruit/shade/flowering trees where wildlife is an issue. Also available in 4' and 6'.

### TUBEX TREE SHELTER 1 Tube Set/\$6.00 (3 foot) (Price varies with size)

Tree shelters are a vital component when attempting to establish hardwood trees and bushes from **seedlings**. The twin-walled, solid, translucent tubes provide maximum protection from animal browse, wind, chemical sprays and equipment. In addition, the greenhouse environment created inside the shelter promotes growth. Includes wood stake, releasable ties, mesh netting to keep birds from nesting.

**(Also available in sizes from 2' - 5', call for price.)**

### FERTILIZER TABLETS - 25 tablets/\$6.00

This unique fertilizing tablet is designed to root feed evergreen and hardwood seedlings and trees, shrubs, roses, fruit, flower and shade trees, for up to two years. It is easy to use, completely non-burning and promotes vigorous growth. The tablet is simply dropped into the hole at the root zone of the plant at planting time. It releases fertilizer slowly for a two year period. These tablets do not dissolve by water, but depend upon the action of soil bacteria to convert their nutrients to a form that can be used by plants. Tablets are 10 grams each, 20% Nitrogen, 10% Phosphoric Acid, 5% Potash. **TABLETS SHOULD NOT TOUCH ROOTS. FERTILIZE AT PLANTING TIME.** --- Number Of Two Year Fertilizer Tablets Per Size Plant: 1 Tablet All Seedlings, Transplants, Rooted Cuttings\*\*\* 2 Tablets Container Grown Plants, Roses\*\*\* 1 Tablet For each half inch trunk diameter, Large Trees and Evergreens\*\*\* 2 Tablets Heavy Field Grown Plants.

**We do all things possible to ensure that your seedlings and plants arrive to you healthy. All stock is purchased from certified nurseries. All seedlings, trees and shrubs are bare-rooted except for potted plants. Please inspect your order at the pick-up location. We have no control over seedlings once they are picked up, therefore, we cannot guarantee survival and will not be held responsible. Orders picked up after the April 23rd date will not be guaranteed.**

# Home Fruit Production Webinar

## Selection, Planting, & Maintenance of Trees, Fruit Bearing Plants and Ornamentals

**Date: March 11, 2021**

**Time: 7:00 pm —9:00 pm**

**Register by: March 7, 2021**

**Please be sure to reserve  
your spot now for this very  
informative session!**

**Call 472-2120 or email  
bard@co.cambria.pa.us**

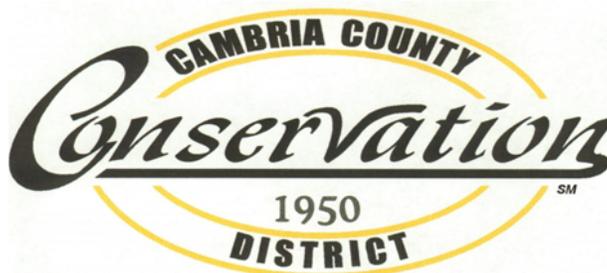

Penn State Extension Horticulture Educator, Tom Ford, will discuss information focusing on fruit bearing trees. Featured topics will include:

- Plant Selection
- Proper Planting Practices
- Mulching Practices
- Pruning Techniques
- Pest Management

Questions will also be addressed regarding maintenance of woody ornamentals and fruit bearing plants, such as raspberries, black berries and strawberries.

Due to Covid19 restrictions, we are unable to hold this session in person, however we are fortunate to have ZOOM ability through Penn State to bring you this informative session.

**Tom Ford has led many successful zoom sessions and is ready to share his knowledge and answer your questions.**

When you RSVP, please provide an **email address**. You will be sent an Invitation and link that will give you instructions on how to join in the Zoom session. Check your email after March 8th for this information.
